- Keep an archive of meetings

Equipment required

Software

Car pooling

To help bring more people to MLUG meetings.

Save money

It's safer

Rolling release distros

Archbang!

<http://archbang.org/>

Pros

Keyboard shortcuts on the openbox are amazing

Very fast

Extensive list in the repositories AUR

Awesome documentation

Fast to install packages

Cons

Couldn't get Crossover games working, but got very close

Not Debian

Bleeding edge

DEMO ARCHBANG!

Debian "Unstable"

<http://www.debian.org/>

Pros

- Fast
- Easy to install
- apt-get and friends
- easy to upgrade
- pretty stable

Cons

- Not the latest (Firefox 8.0 & Kernel 3.1)
- Have to customise a lot to get where Archbang! is.

DEMO Debian Testing

Linux Mint Debian 12

http://www.linuxmint.com/download_lmde.php

Pros

- All setup/Ready to use
- Uses Debian "Testing"
- Easy to use

Cons

- Too bloated for what I want

Gentoo

<http://www.gentoo.org/>

Pros

- Fast

Cons

- Have to compile everything
- Hardest of the lot to install

NOTE:

There are binary packages now for gentoo so you don't have to compile everything.
